

Specifications	
Manufacturer:	VIBIEMME
Model:	Domobar Super Double Boiler
Machine Type:	Semi-Auto
Boiler Type:	Double
PID:	Yes
Three Way Solenoid:	Yes
Basket Size:	58 mm
Coffee Boiler:	.5 L
Steam Boiler:	1.9 L
Water Reservoir:	1.2 L or Direct Connect
Electrical:	240 volts /1,600 Watts / 7 Amps
Dimensions:	10.6" W x 21" D x 16.5" H
Weight:	37.2 Kg

DOMOBAR SUPER DOUBLE BOILER PID

The highly anticipated Vibiemme Double Domobar espresso machine is here! The famous Italian espresso machine manufacturer has updated its premier prosumer espresso machine. This machine features four of the most coveted espresso machine features: double boilers, E61 grouphead, PID control, and the ability to use the water tank or direct connect to a water line.

HIGHLIGHTED FEATURES

- Stainless Steel Body
- Double Boiler machine which allows for steaming and pulling shots simultaneously.
- Uses PID (Proportional, Integral, Derivative) technology which allows you to control the water temperature of the coffee boiler.
- Commercial grade rotary vane that allows the customer to direct connect the machine to a water line. There is also a 1.2 Liter water reservoir for those that don't want to connect directly.
- 15 Amp machine means that no adapter is necessary for standard home 110 volt hook-ups.
- Has the legendary Faema E61 grouphead. A commercial quality grouphead that helps greater ensure temperature stability.

STANDARD FEATURES

- Rotary vane pump and commercial-grade motors are quieter than a vibration pump, but can be more expensive to replace. This makes descaling your machine regularly important.
- Small 1.2 Liter water reservoir that allows for up to 20 double shots before needing to refill
- OPV (over pressure valve) which directs excess water pressure to the drip tray instead of the water reservoir so as to avoid water build up and mildew for those that are using the direct connect
- Drip tray has the option to connect to a drain without purchasing any additional kits
- Insulated copper coffee and steam boiler for better energy efficiency
- Jaeger pressurstat monitors boiler pressure in steam boiler
- Boiler and Pump pressure gauge
- Multi-directional stainless steel steam wand and hot water wand
- Power, heat, and low water indicator lights
- Three stage power switch allows user to fill internal boiler without sending power to the heating element (prevents damage upon initial start up)
