VIBIEMME REPLICA

PROVEN STANDARD OF EXCELLENCE

The Replica was designed for the precision and performance needed by baristas who expects the best from their espressos.

Replica embodies the very history of VBM. The balanced mix of the classical look from the famed VBM E61 group and clean design makes the Replica an ideal fit to any café bar.

VBM E61 GROUP

A TIMELESS ICON

The espresso-brewing Group by definition. A timeless icon that has indelibly marked the history of Italian coffee making over the last half-century, and not only. A small gem of Italian mechanics dating back to the sixties that is still successfully installed on many professional machines, with an aesthetic so appealing that it remains proudly in sight on all 1961 machines, so as to not lose any of that timeless charm that no one has been able to equal.

VBM REPLICA

STEEL ON THE OUTSIDE

A REFLECTION OF PASSION ON THE INSIDE

The design of Replica has been evolving since the first model created in 1983. When creating Replica, we have never saved on the use of materials that characterise the design of this espresso machine. All Replica machines are made in steel of the highest quality, perfectly manufactured and assembled to create elegant and modern forms with a gently vintage design.
